

Sven Neumann

32 Years old

Context

Sven is returning a damaged item from his smartphone immediately after unpacking the parcel at home during his lunch break.

Shopping Habits

- Frequent online buyer
- Tries items on at home
- Prefers mobile workflows

"I just want a simple mobile process—no printers, no support calls, no hassle."

Core Goals

- Fast Mobile Return: Complete registration under 2 minutes.
- Easily register a damaged item return on mobile without needing to call customer support.
- Know instantly whether his return package has arrived at the warehouse and track his refund status.

Frustrations

- Data Loss: Forms that wipe input on upload/validation error.
- Unclear Fees: Surprise return shipping cost deductions.
- Forced Printing: Needing a physical printer for labels.
- Cryptic Error Messages: System codes like "Error 422".
- Hates to call Customer Support to check for status of returned Items.

UX Requirements for Nordlicht

- Dynamic conditional file upload (triggered only when damage is selected).
- Full data retention on form validation errors.
- Instant status tracking timeline & paperless mobile drop-off QR code.

Payment Platform

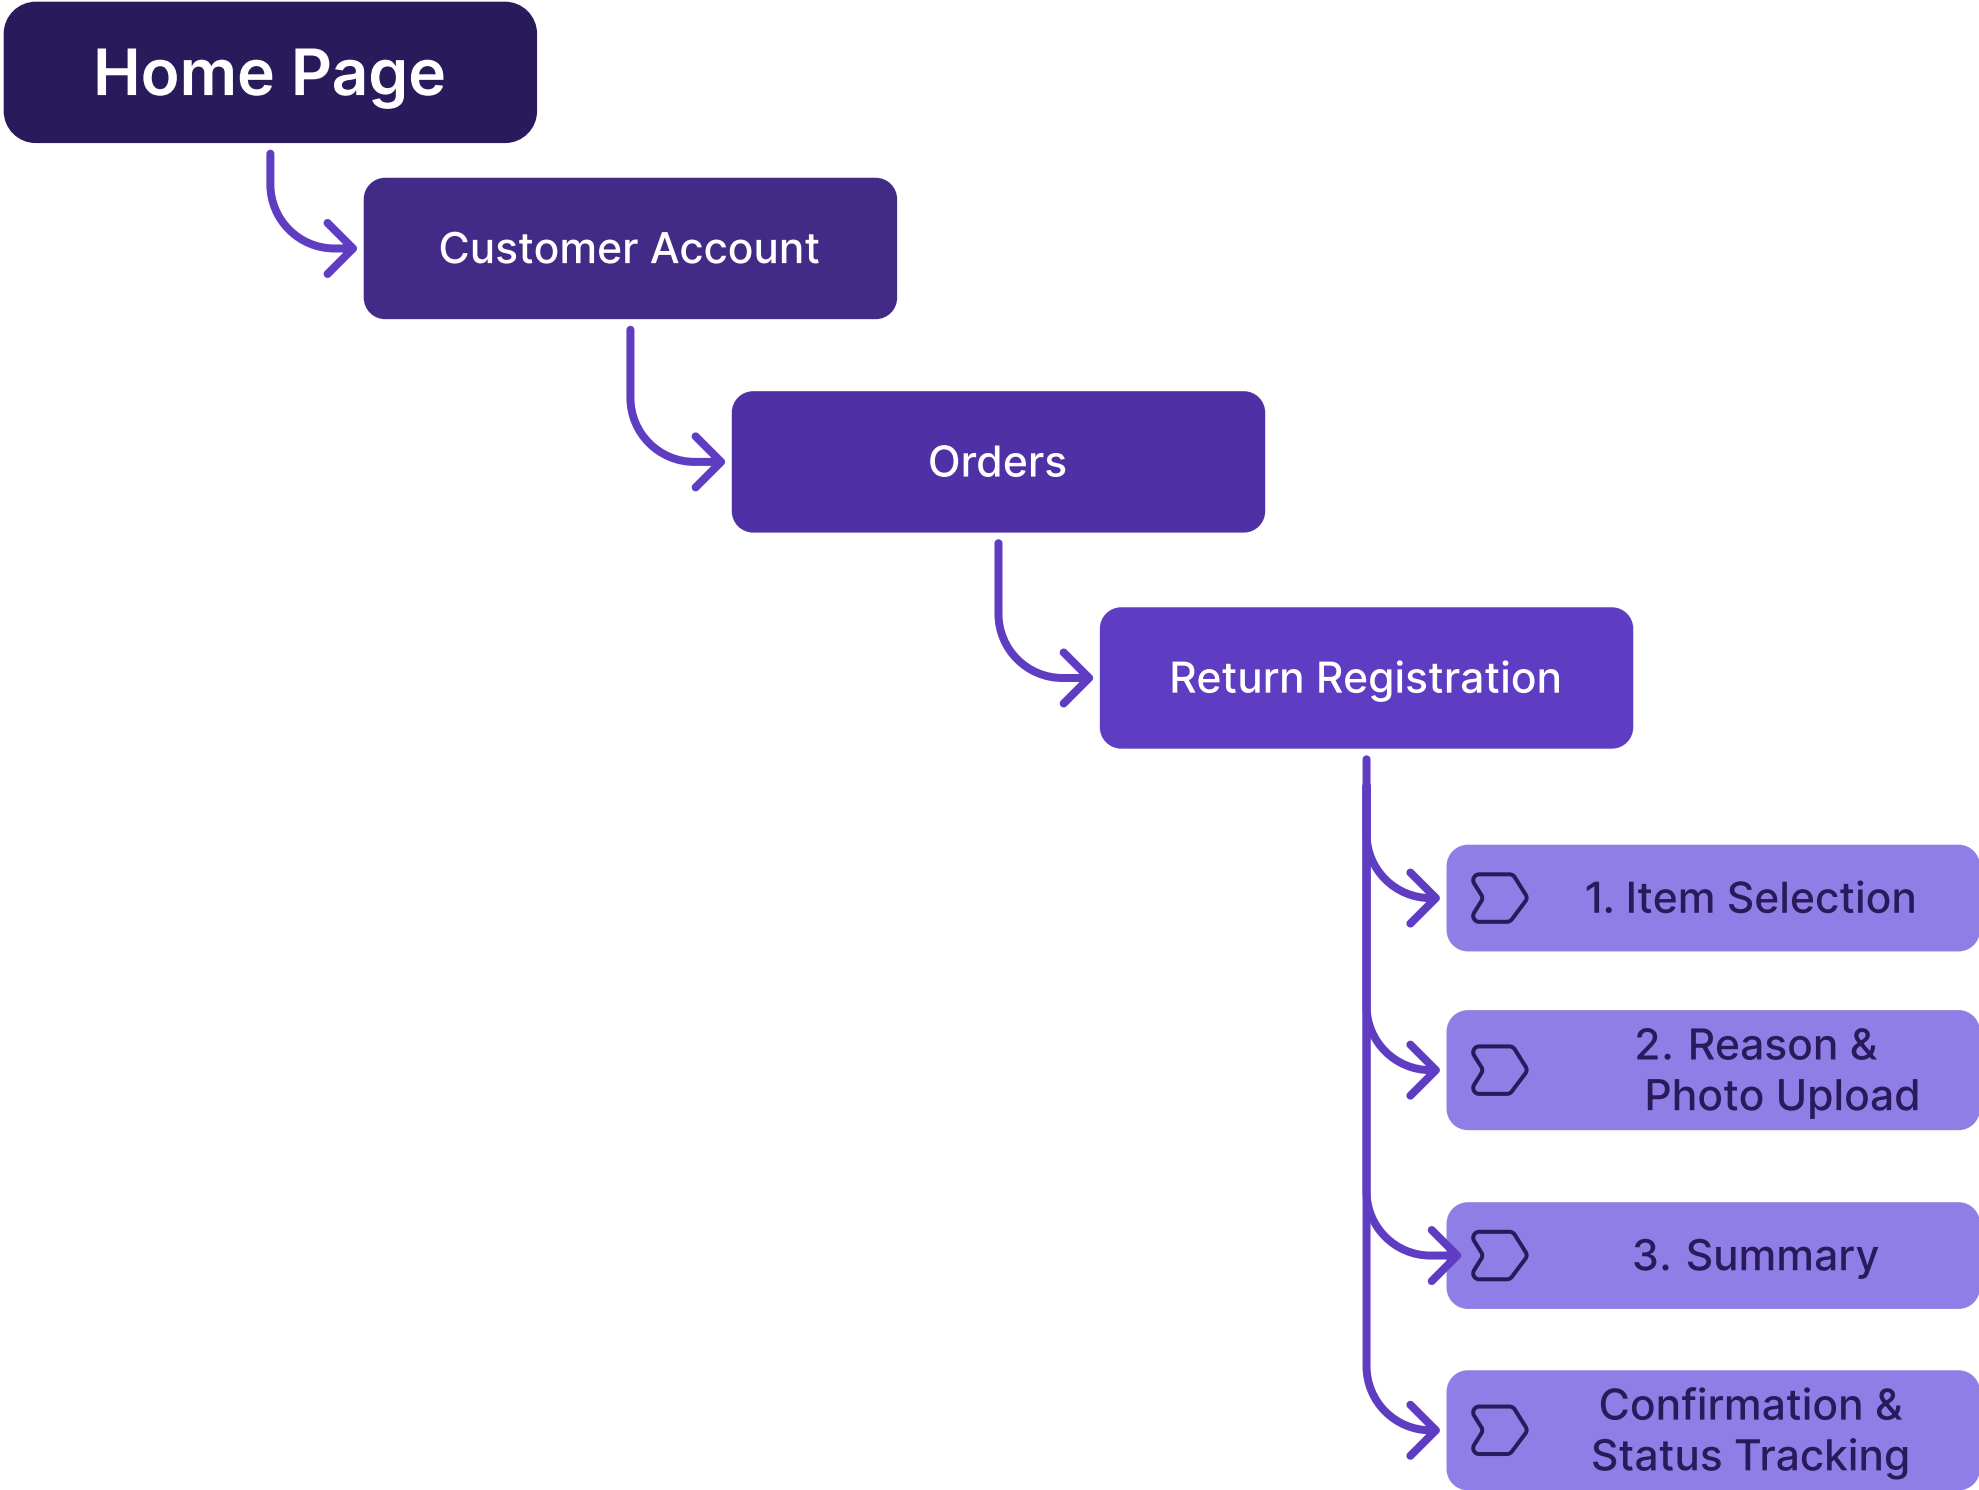

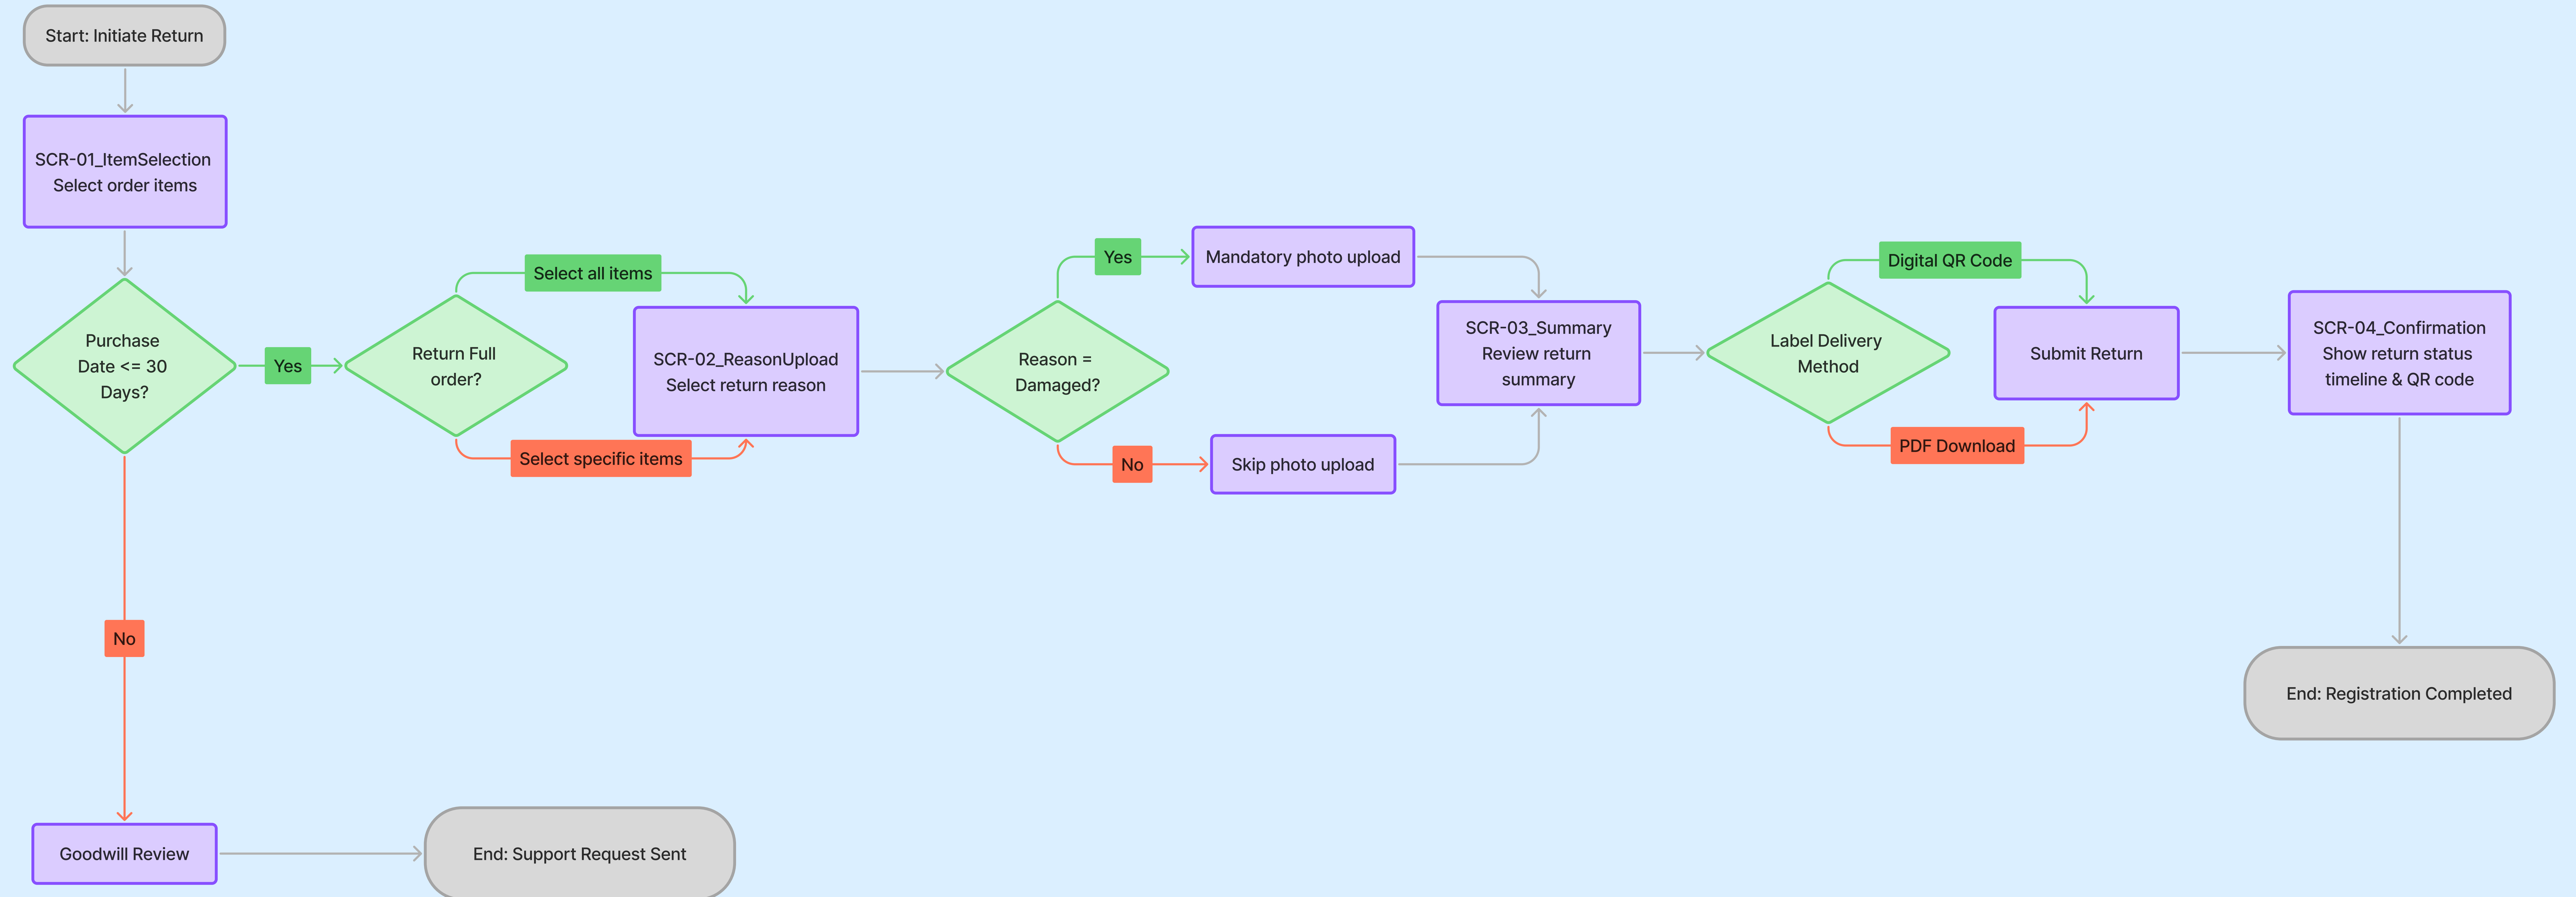

Mobile App

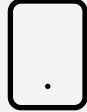

Payment Method

Digital
Payment

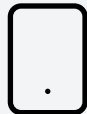

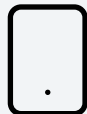

SCR-01_ItemSelection

Select individual items to return from a multi-item order.

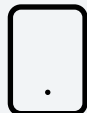

SCR-02_ReasonUpload

Specify return reason and upload damage photos.
